EDUCATION

University of Southern California

Los Angeles, CA

Bachelor of Science, Computer Science (Games)

September 2022 - May 2026

GPA: 3.9/4.0

Relevant coursework: Programming Game Engines, Professional C++, Computer Graphics, Game Prototyping

Awards: GDC Game Narrative Review Competition Gold Winner (2023), GDC Game Narrative Review Competition Platinum Winner (2024)

PROJECTS

Engineer - *Glorgo's Microplastics Mine* (Unity)

July 2025 - Ongoing

- Implement an incremental worker management game as part of a four person engineering team.
- Collaborate closely with the design team to ensure design concepts are technically sound whilst retaining artistic intent.
- Implement pathfinding and behaviour for autonomous 'miner' entities, ensuring that pathfinding never causes the game to exceed desired frame time of < 16ms.
- Test and profile using the Unity Profiler to identify potential performance improvements.

Developer - *Prometheus Protocol* (Godot)

July 2025 - Ongoing

- Design and implement all the mechanics of a 1st person action platformer using GDScript.
- Create and design unique levels that show off unique movement mechanics.
- Create and edit sound effects and music, integrating audio assets using FMOD.

Engineer - *Steel Dominion* (Unreal)

July 2024 - July 2025

- Collaborated closely with lead designers to best translate their vision to game code in Unreal Engine, using a combination of C++ and Unreal Blueprints.
- Tested and profiled to identify potential performance improvements, eliminating frame times of up to 40ms.
- Implemented component-based framework for enemy implementation, and implemented 3 enemies with unique behaviour.

SKILLS

- **Programming Languages & Libraries:** C++, C#, Python, Java, HTML, CSS, MySQL, SDL, OpenGL, GDScript
- **Software proficiencies:** Godot, Unity, Unreal, Perforce, Git, Microsoft Visual Studio, JetBrains Rider, Blender, Reaper, FMOD
